

Take Control & Save
A Cooperative Effort for Energy Efficiency

www.TakeControlAndSave.coop

Ozark Electric Cooperative members!

Replace your old incandescent light bulbs with the new energy-efficient compact fluorescent lighting (CFLS)!

There are lots of good reasons to make the switch to CFL bulbs, but the best is the tremendous **energy savings** they make possible. According to the U.S. Government figures, replacing one incandescent bulb with an ENERGY STAR qualified bulb in every American home would conserve enough energy to light more than three million homes for a year.*

Another great reason to switch to CFLs is that it is **easy**. The new bulbs are readily available at many retailers. As a member of Ozark Electric Cooperative, we can get you started by giving you five (5) free bulbs (limit 5 per member). Simply stop by one of our offices, pick up your free bulbs, take them home, remove your old bulbs, and replace them with the new CFLs. You'll immediately begin saving every time you use the lights!

**Stop by one of our offices and
pick up 5 FREE CFL bulbs.**
